How This Directory Was Compiled

This directory has been compiled based on information within the comprehensive Business Information Agency database. This vast database is updated throughout the year utilizing a variety of methods, including direct mail, fax and phone campaigns, broad Internet research, and our continued dedication to directly contacting industry experts to assure that the Business Information Agency database reflects the most current information available at press time.

ATTENTION:

PlanetInform's directory is an objective source of business information; it is not a trade directory and does not carry advertising. Although every care has been taken during the preparation of this publication, it is possible that omissions or errors have occurred. Human or mechanical errors are also possible when processing the information. The publishers do not accept responsibility for any errors or omissions in this directory.

In furnishing the directory, Business Information Agency, Inc., cannot guarantee the completeness, accuracy, or timeliness of the data contained in this directory or the correctness of information on which it is based. Business Information Agency, Inc., does not accept responsibility for errors or omissions or any consequences arising thereof. Business Information Agency, Inc., in no way assumes any part of the business risk of the user and is not liable for any loss or injury resulting from conditions beyond its control or from negligence. If this directory is used for mailing purposes, there is no refund for undeliverable mail.

Errors, after they have been detected, will be corrected in future editions.

From the Publisher

Greetings,

Russia is a country with unique opportunities for business — a huge consumer market with unsatisfied demands and a qualified and eager workforce with increasing wages and salaries. How has this economic situation happened?

First, the country has tremendous natural resources (over 12% of global oil reserves, approximately 230-240 trillion cubic meters of natural gas, and the world's fourth largest deposits of iron ore and coal) that provide steady income growth for the Russian population. Second, the level of development in most the Russian consumer industries isn't large enough to satisfy the growing demands of 143 million people. Today, foreign companies have excellent opportunities to establish business in Russia with competitive advantages.

Today, thousands of foreign-owned companies are currently doing business in Russia. Among the brightest American and foreign companies operating in Russia are BP, Cargill, Kraft, Lucent Technologies, Procter & Gamble, Hewlett-Packard, PepsiCo, General Motors, and 3M. This indicates that foreign businesses can be successful in Russia's business climate, with businesses able to plan long-term strategic interests.

Towards this end, PlanetInform offers comprehensive, reliable information about the Russian market with two different information resources, ideal for both company directories and market analysis:

- 62 business directories presenting 240,000 operating companies — with information available as an online database, printed directory, ebook (PDF), computer database, and company lists.
- 43 analytical yearbooks covering yearly trends in major economic and social areas: business profiles, market forecasts, and investors' handbooks describing the Russian market in great detail – the economic opportunities plus the social and demographic situation in each Russian region.

Our business directories and analytical yearbooks present a unique look inside the Russian market. They enable you to locate and select particular the Russian companies as potential business partners; the hundreds of socioeconomic indicators in our yearbooks give exceptional insight into the actual conditions under which these companies work, allowing you to make knowledgeable decisions in whether to invest in a particular region or industry.

Additionally, most directories include a chapter filled with important aspects of the Russian business climate: economic trends and political review, tax system and investment laws for domestic and foreign businessmen, international and regional institutions such as domestic and foreign banks and insurance companies, plus a listing of the Russian federal and regional government contacts. All of these areas are integral for anyone expanding into the Russian market.

Whatever details on the Russia market you need, you will find in our comprehensive research – from locating potential business partners to learning the structure of the tax system. I strongly believe that you will find our information products an indispensable tool for developing and managing your Russian interests.

We appreciate your business and invite you to contact us with any questions, comments, or suggestions for improvement.

Sincerely,

Violetta Yufereva

Vice President

PhD, Economic Science

Introduction

Key Chemical Manufacturers of Russia and the Former Soviet Republics

We are pleased to present the fifth edition of our business directory, *Key Chemical Manufacturers of Russia and the Former Soviet Republics*. Gain easy access to key data on 3,600 of Russia's largest companies in the following industries: chemicals, petroleum refining, and rubber and plastic. Published and updated annually, the business directory *Key Chemical Manufacturers of Russia and the Former Soviet Republics*, is one of our most popular industrial directories. The companies included in this directory represent excellent opportunities for foreign investment because the market of Russia and the Former Soviet Republics is one of the largest international markets today.

Referenced by business executives, investment analysts, and researchers, this useful directory quickly identifies potential customers and business partners in the chemical market of Russia and the Former Soviet Republics. New to this latest edition are more detailed company entries which include – but are not limited to – company name, address, telephone, fax, e-mail, web site, key personnel, and principal activities, number of employees, sales volume, public/private status, and principal subsidiaries. This extensive business information makes this directory the most comprehensive guide to the chemical market of Russia and the Former Soviet Republics.

Organization

Our research team has conveniently organized *Key Chemical Manufacturers of Russia and the Former Soviet Republics* so that users can quickly and efficiently locate any company. The directory includes both alphabetical and SIC business activity indexes for easy access to information:

- The Standard Industrial Classification (SIC) business activity index lists companies by their various business activity codes.
- The alphabetical index lists all companies with entries in alphabetical order, irrespective of their main country of operation.

Compilation

Key Chemical Manufacturers of Russia and the Former Soviet Republics has been compiled from information within the PlanetInform database. This vast database is updated throughout the year utilizing a variety of methods including direct mail, fax and phone campaigns, broad Internet research, and our continued dedication to directly contacting industry experts to assure the PlanetInform database reflects the most current information available at press time. New listings are gathered by using many other alternative sources of information, such as governmental statistical agencies, leading business magazines, trade shows, and business seminars. PlanetInform's editors identify potential new listings through their daily research and as a result of submissions by an organization itself or by third parties.

Listing Updates

We welcome all information updates and suggestions for new listings. Please submit these by using the form that follows this preface. Fill in the requested information, and mail the form to the appropriate office of Business Information Agency:
