How This Directory Was Compiled

Information for this directory was derived from data contained within Business Information Agency's comprehensive database. This database is updated throughout the year using a variety of methods including direct mail, fax and phone campaigns; Internet research; and direct contact with industry experts to ensure the presentation of accurate information.

ATTENTION:

PlanetInform's directory is an objective source of business information; it is not a trade directory, nor does it contain advertising. While care has been taken to provide accurate information, it is possible that omissions or errors have occurred. Human or mechanical errors are also possible when processing the information. The publishers do not accept responsibility for any errors or omissions in this directory.

In furnishing the directory, Business Information Agency, Inc. cannot guarantee the completeness, accuracy, or timeliness of the data contained in this directory or the correctness of information on which it is based. Business Information Agency, Inc., does not accept responsibility for errors or omissions or any consequences arising thereof. Business Information Agency, Inc., in no way assumes any part of the business risk of the user and is not liable for any loss or injury resulting from conditions beyond its control or from negligence. If this directory is used for mailing purposes, there is no refund for undeliverable mail.

Any detected errors will be corrected in future editions.

Letter from the Publisher

With 360 unique international business directories and databases comprised of information about 3.2 million companies across a myriad of major industries in 60 economic-developed countries in North America, Eastern and Western Europe and Asia, the international marketplace and its key players are the core of our business.

In these directories, business users will find the widest variety of data available on the market today. From comprehensive, easy-to-use business directories and handbooks to in-depth analyses and market forecasts, BIA publications explore the most critical elements of global economics, manufacturing, wholesale and retail, agriculture, finance and insurance, construction, transportation, and service industries.

We present data that addresses both macro issues (including important socio-economic indicators), or micro information about specific industries in countries, their growth prospects, and foreign trade activities. Alternatively, our strategic data services concentrate on specific geographic regions and conditions.

Online Database

If you are looking for an effective and efficient way to do business, our PlanetInform Online Database is the best way to target new customers and establish business contacts. Select your potential customers from more than 3.2 million companies worldwide by location, type and size of business.

Market Research Reports

To learn about the Russian market, our PlanetInform Market Research Reports are indispensable tools, providing details about the region's domestic economic, social and demographic conditions. Choose Business Profiles, Market Forecasts or the Investor's Handbook for unique statistical and marketing information about the Russian and CIS markets.

Business Directories

PlanetInform's Business Directories are a superior source of comprehensive, reliable information. To locate the applicable directory or database, simply select a geographic location, SIC Code, or product category of interest. Alphabetical and product indexes within the PlanetInform Business Directories are available in hard copy or e-book format.

Working in close collaboration with governmental statistical agencies, premier think tanks, and state research institutions in Russia and CIS, BIA has conducted in-depth industry- and territory-specific research in diverse areas ranging from the largest to more obscure industries. We are particularly focused on business opportunities in Russia, CIS and in 69 of Russia's regions and cities. This publication is a "must-have" for anyone seeking current accurate economic analysis to evaluate business opportunities and market conditions. We look forward to meeting your informational needs.

Oleg Yuferev, PhD. Economics

Preface

Welcome to the new 2006 edition of *Essential Canadian Manufacturers: Food, Textile, Clothing & Chemical Companies*. Compiled by an accomplished editorial team, this directory contains important data that is used by business and financial executives, investment analysts, and researchers to quickly and easily identify potential customers, trading partners, joint venture prospects, and/or acquisitions in this increasingly significant market. We are confident that this directory will provide you with invaluable information that will aid you in making critical business decisions.

Main Sources and Research Methods

Information in this directory derives from PlanetInform's database of global company data. All entries have been reviewed, updated as required, and compiled by an experienced team of researchers and editors. Each feature company has been individually researched, either by direct contact with the company concerned (via questionnaire, letter or telephone) or by supplemental research through regional media, trade journals, and official business publications, including online sources. Every effort has been made to contact all firms to verify their information, with the exception of the annual sales figures, which are considered confidential by many companies.

The criteria for selecting companies for inclusion in this directory are based on sales volume and gross income of total assets, as appropriate. All entries are published free of charge. Because of the fluctuating nature of the business world, the list of top-ranked companies is frequently subject to change. Therefore, if you cannot find a particular company, please contact us for the information you need.

Key Information Fields Provided by This Business Directory

Contact Details – Company name, address, telephone and fax numbers, and first/last name of the owner or other principal (where available).

Operational Details – Line of business, manufacturing indicator, and SIC code(s). This information is essential for a complete business picture of potential customers or suppliers.

Corporate Details – Number of employees and sales volume ranges (for most businesses).

Typical Company Entry - Company descriptions include, as available, company name, address, domestic and international telephone and fax, email and website, key personnel, principal activities, number of employees, sales volume, public/private status, and the date of establishment.

An Explanation of the Standard Industrial Classification (SIC)

The Standard Industrial Classification (SIC) system used in this directory was developed by the United States government to classify businesses by the industry in which they operate.

The SIC system separates all activities into broad industrial divisions (manufacturing, mining, retail trade, etc.), which are further subdivided by group and specific output:

- The major manufacturing industry class is given a two-digit code
- Industry subdivision given a three-digit code
- The various industrial products are assigned four-digit codes.

Note that only two- and four-digit codes are used in this directory.

For example:

<i>Industry Breakdown</i>	<i>Code</i>	<i>Industry, Product, etc.</i>
*Major Industry Group	20	Food and related products
Industry Group	203	Canned and frozen foods
*Industry	2033	Fruits and vegetables

*Classifications used in this directory.

We welcome your comments and suggestions regarding this publication. Likewise, we ask that you contact us if you are interested in having your company or association included in *Essential Canadian Manufacturers: Food, Textile, Clothing & Chemical Companies*.

Finally, we, the publishers and editors, offer our thanks to all those who have contributed to the preparation and completion of this ambitious task.
